USE CASES

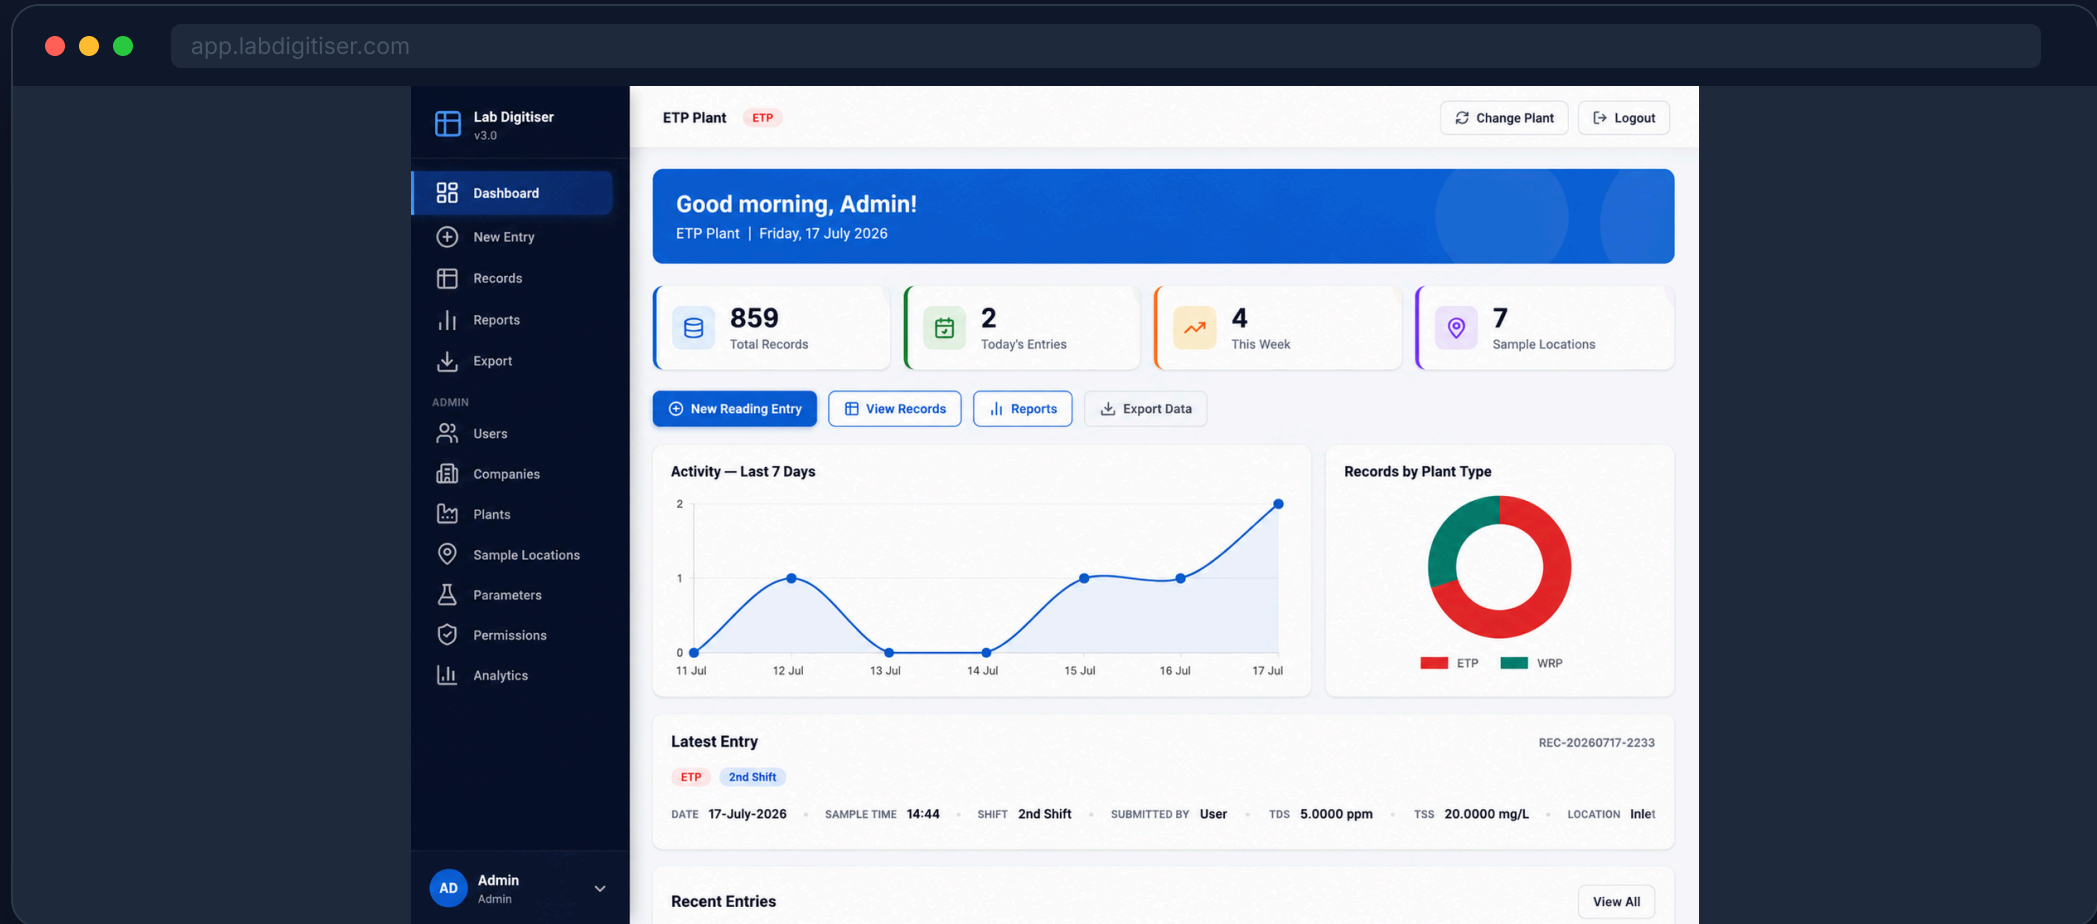

Built for Industrial Plants

Lab Digitiser is purpose-built for water treatment and environmental monitoring at industrial scale.

ETP Plants	WRP Plants
Multi-Site Companies	Regulatory Compliance
Distributed Teams	Trend Analysis

A Command Centre for Your Plant

The Lab Digitiser dashboard gives admins a full 360 degree view from reading records to user management and data export.

Activity Dashboard

Consolidated Records

Admin Controls

Secure Login

Each operator has their own account linked directly to their assigned plants and company.

Home Dashboard

Personalised greeting, assigned plants, and today's readings for PH, TDS, BOD, and COD at a glance.

4-Step Entry Wizard

Plant and Location, Date and Time, Parameters, Review and Submit. Simple and error-proof.

Scientific Profile

View plant assignment, location, and assigned modules so operators always know their zone.

Offline-Friendly UX

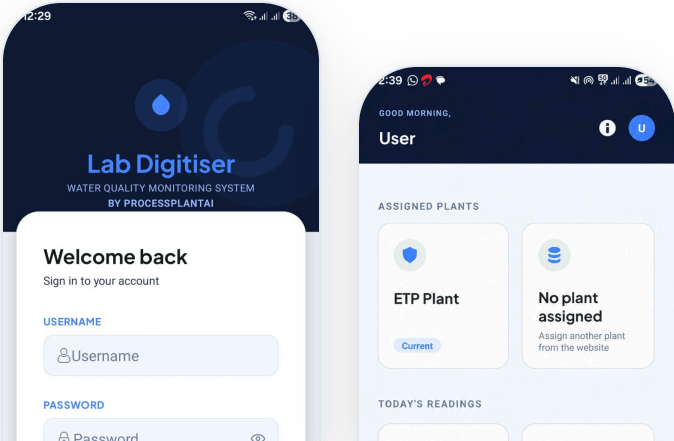

Lightweight interface built for real industrial environments, works on low-end devices in poor connectivity areas.

DOWNLOAD FOR ANDROID

Lab Digitiser App

Android APK · v3.0 · Free for authorised operators

Download Lab Digitiser on Your Phone

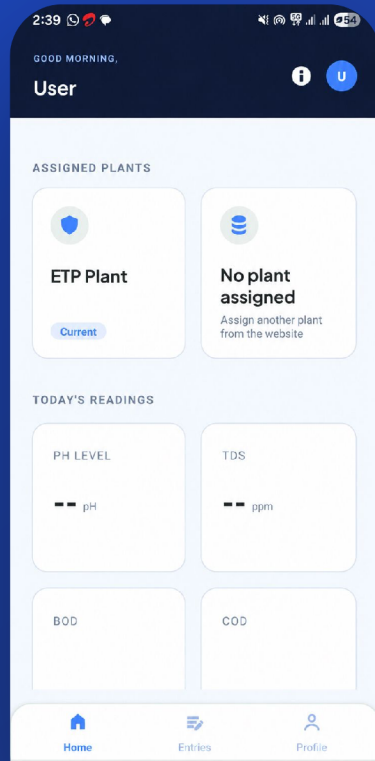

Available as a direct APK download. Install on any Android device and start submitting water quality readings immediately. No Play Store required.

Lab Digitiser v3.0

Free download · Enable Install unknown apps in Settings · No account needed to install

PROCESS

How Lab Digitiser Works

From field sample to digital record in four simple steps.

1

Admin Setup

Admin configures companies, plants, sample locations, parameters, and user accounts on the web platform.

2

Field Sampling

Operators collect physical samples from assigned plant zones: inlet, outlet, aeration tank, sump, and more.

3

App Submission

Using the mobile app, operators enter PH, TDS, TSS, COD, BOD, Hardness readings in the 4-step wizard.

4

Analyse and Export

Admins review the dashboard, run reports, and export consolidated CSV data for compliance and review.

WHY LAB DIGITISER

Made for daily plant readings

A simple way for operators to capture lab data and for managers to review it without chasing paper logs.

Quick entry from the field

Operators add plant, shift, location, and readings from their phone in a clean step-by-step flow.

Clear dashboard view

Review recent submissions, trends, and plant activity from one web dashboard built for quick checks.

Export when you need it

Download records for audits, reviews, or reporting with the filters your plant team already uses.

Ready to go paperless?

Digitise Your Laboratory Today

Join the growing network of industrial plants that trust Lab Digitiser to keep their water quality data accurate, accessible, and actionable.
